

The ESP Network of Energy Professionals:

Earn More with the Top Retail Energy Partner in the Industry

Established in 2013, **Energy Smart Pro (ESP)** has become the largest network of energy agents, brokerages, and consulting firms on the planet! We have created a home for our partners that allows them to compete at the highest level while scaling their retail energy business to new heights. We are a privately held company with deep financial backing and we offer more incentives, benefits, technology, support, and flexibility than any other energy network or broker shop!

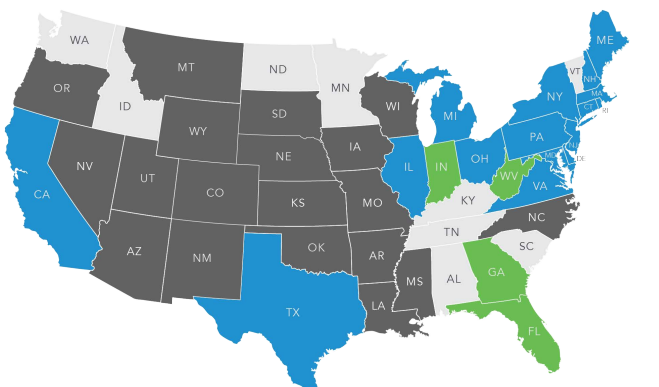

WHY DEREGULATED ENERGY?

There is one common need for nearly every business: energy

At the same time, the energy industry has become increasingly deregulated, allowing for more suppliers to enter the market, increasing competition, and decreasing the cost of energy to consumers. This combination means that nearly everyone is a potential customer, no matter the business or service they provide. This creates an unparalleled opportunity for sales professionals and savvy businesspeople to make a lucrative career offering better energy rates to commercial property owners.

GAIN ACCESS TO ALL SUPPLIERS IN ALL MARKETS

ESP is partnered with over 90 energy suppliers, and operates in every deregulated market in North America. This enables energy brokers and consultants to expand their business to new markets and provide their customers with the best rates on energy, saving them thousands of dollars every year on their energy bills. When working with **ESP**, your offer becomes a no-brainer for your customers.
